

PHILIPS

Water Dispenser

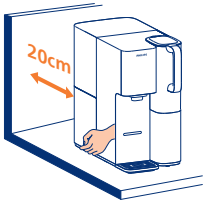

Quick Start Guide

USER MANUAL

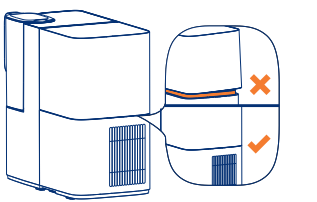

Setup

1

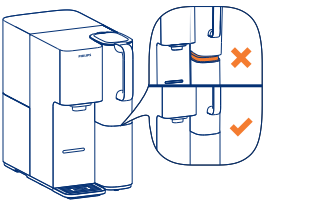

Position the unit at least 20 cm away from walls for proper ventilation.

2

Place the tap water tank on top, ensuring it seats correctly.

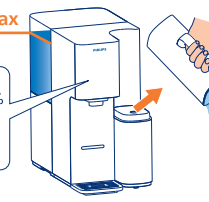

3

Install the filtered water jug.

New Filter Flush

1

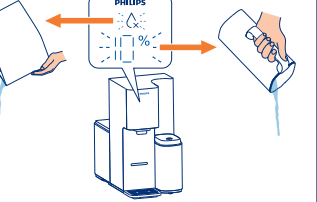

① Fill the tap water tank up to the “Max” water level line.

② Empty filtered water jug.

③ Press and hold “ Cleaning” for 3 seconds.

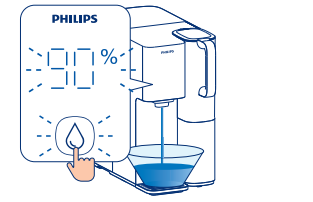

2

“” Blinking: remove tank → empty & refill → reinsert to resume flushing.

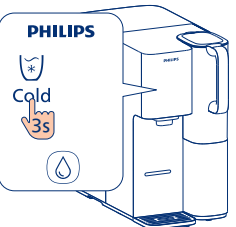

“%” Blinking: Beeps every 10%. Empty the jug after each beep. Repeat until progress reaches 80%.

3

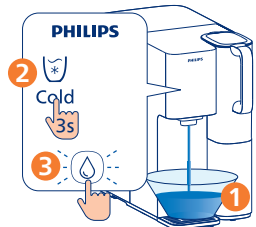

At 90%, place a large container under the spout and press “” to start dispensing. At 100%, flushing is complete. (You can press “” again to pause dispensing at any time.)

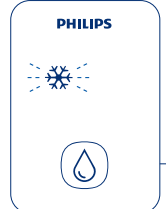

Cooling Function

Turn On:
Press and hold the “ Cold” for 3 seconds

Turn Off:
① Place a large container under the spout.
② Press and hold the “ Cold” for 3 seconds.
③ Press the “ ” to begin draining. (Press again to pause if needed.)

Indicator Light	Meaning
	Light off
	Blinking
	Solid

Allow about 20 minutes for the initial cooling to reach the set temperature.

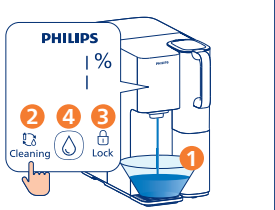

Cleaning Function

1

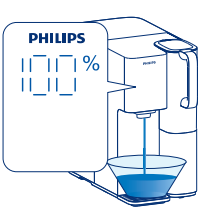

Wait until the filtered water jug is full, and the “” indicator light turns off.

2

Place a large container and press “ Cleaning” → “ Lock” → “ ” to start.

3

When “100%” flashes, the cleaning process is completed.
